WAVE

A photograph of a modern office interior. The scene is dominated by glass partitions and doors. In the foreground, a dark wood floor is visible. A wire basket filled with rolled-up documents sits on the floor in the middle ground. To the right, a white chair with a metal base is partially visible. In the background, a desk with a computer monitor and a chair can be seen through the glass. The lighting is bright and even, highlighting the clean lines of the office furniture and the transparency of the glass.

Published on Muraflex.com

Muraflex transforms floor plans into architectural spaces. With a European touch, their design-savvy demountable glass office wall systems and free-standing pods create a distinguished work environment, bringing elegance and purpose together.

The Muraflex engineers have crafted the industry's most aesthetically comprehensive demountable glass office wall solutions. With an unflinching commitment to R&D and ecologically-sensitive designs, they aim to be pioneers and develop better solutions to respond to the challenges architects and designers are continually face.

Rather than permanent drywall, benefit from safe, flexible and reconfigurable walls through one of our 7 lines: MIMO, FINO and QUADRO our demountable glass partitions, EXPO our telescoping door, the versatile demising wall system PLANIKA, and finally two freestanding pods: ARCO and ZITTO.

MIMO

Put less between you and your vision

MIMO is a perfect option for all commercial designs, such as offices, public spaces, or sanitary needs such as hospitals or laboratories. Made from fully recyclable aluminum, the extrusions are available in countless colors and finishes and can accept a variety of glass and wall panels. Our MIMO range has all the required and necessary conformities, compliances, tests, certifications and contributes to the LEED and WELL codes.

Our MIMO range has all the required and necessary conformities, compliances, tests, certifications and contributes to the LEED and WELL codes.

Glazing & Solid Panels

MIMO accommodates all design and performance preferences. In glass or solid panel, MIMO is available in single centered or offset glaze and in double pane for superior acoustics and STCs.

FINO

Thin. Modern. Architectural.

Clean lines and thin profiles. Reveal the beauty of every interior space while enhancing architectural features and letting in more natural light. Inspired by a sleek design aesthetic, FINO from Muraflex is a streamlined demountable glass wall solution, providing flexibility and convenience with less bulk. Made from fully recyclable aluminum, Muraflex offers European style with domestic lead times.

A Unique Solution

FINO is a leader in innovation and engineering with superior quality in performance and design. Minimal and elegant, FINO has an exceptional design, and any architect's dream, of perfect alignment. With the need for superior acoustics and achieving higher STC scores, all FINO doors, whether swing or sliding, are inimitably engineered to perfectly seal closed.

QUADRO

Highlight your workspace.

QUADRO is designed with elegance and prestige in mind. With its recessed reveal, QUADRO creates a picture frame effect highlighting your office space like a work of art.

A Unique Solution

QUADRO makes it easy to meet your own design needs by making your office space luxurious on both the inside and outside. By mixing and matching profiles and finishes, you create your own ambiance.

EXPO

Multiply your options - EXPOentially.

EXPO makes your space adaptable and dynamic. It's a telescoping door system that allows you to use what you have to create what you want. Open space. Private rooms. Natural light. Soundproof privacy. Whatever you have in mind.

Highly expandable, functional, and dependable, EXPO helps you think about square footage in a new way.

A Unique Solution

A unique ceiling-hung construction is what makes EXPO stand out. A patented upper attachment allows EXPO's panels to hover just millimeters above the floor—and glide effortlessly when opening and closing. Inter-locking and telescoping construction provides the structure to resist bowing and flexing. That's because each panel in the system is linked to the one next to it. The benefit: Even without a floor track or threshold, EXPO stands its ground. It's an industry-leading system that provides dependable separation when you need it, and leaves no trace when you don't.

PLANIKA

Modular walls - Stylish. Smart. Safe.

PLANIKA demising demountable office wall systems are fully demountable offering versatility and flexibility of design in any space without the long-term commitment of conventional drywall construction. Its steel structure is robust and its modularity makes it easy to interchange panels and add furnishings in no time. Electrical and plumbing ready, safe and easy to clean, PLANIKA is the perfect solution for all settings including office, retail or hospital, and other healthcare services.

A Unique Solution

PLANIKA provides the freedom to customize your workspace using several different colors and material choices. Going from mismatched surfaces on either side of the partition to the insertion of hanging furniture, the possibilities are countless. PLANIKA demising wall system allows the flexibility to change your mind as many times as you like without even affecting the internal structure of the system.

ARCO

Collaborative Work - Made easy and private

Encourage collaboration and the exchange of ideas in an architecturally discreet space with a superior level of acoustic privacy. ARCO is a freestanding pod that offers great visual transparency and whose geometrical disposition helps to reduce the noise disturbance often found in the open floor plan workspace. ARCO is designed to be easily disassembled and repositioned to offer the most flexibility for the ever-changing, fast-paced work environment.

A Unique Solution

ARCO is fully equipped for collaborative work efforts to be as productive as it can be. ARCO's partially open ceiling allows for air circulation, keeping the ambient temperature constant and therefore meetings have no time limit. The acoustic paneling above absorbs sound so your conversations may remain private at all times and an integrated LED lighting strip ensures the pod is properly lit for when you need to get into the nitty-gritty details of your project.

ZITTO

Do it your way - and Zitto

Designed to eliminate unwanted distractions in open-plan office environments, the freestanding pod Zitto is not only a soundproof private space but also a beautifully designed piece of interior architecture. With its glass panels and sleek frame, Zitto is visually unobtrusive in any workspace while spacious and welcoming for productive closed meetings.

A Unique Solution

Stylish and sophisticated, the freestanding pod Zitto offers a wide range of flexible options making your pods unique. Using cutting-edge technology, Zitto provides an innovative workspace solution carefully engineered to create a superior acoustical environment, along with many other possibilities of plug&play technologies including media and wifi capabilities. From the design-savvy frame to the luxurious qualities on the inside, Zitto is fully customizable and offers a wide range of materials, finishes, features and technological options. Bring Zitto into your workplace.
