

PRODUCT SOLUTIONS

FOR A CLEAN, HYGIENIC WORKPLACE

Alterna®

As healthcare has taken a major pivot, the needs and expectations of patients and caregivers are also changing, altering the course of traditional healthcare environments.

Alterna is designed to support this evolving landscape with seamless and durable solutions for the entire facility - from public zones, to clinical areas, to workspaces and more.

The Alterna Equipment Rail & Mounting Brackets allow accessories to cleanly attach to the wall with minimal mounting points. As needs change, accessories can easily snap on or off of the rail to support patients and caregivers

KORE™

KORE was designed for working and living - complete with elements for privacy, media integration, and solutions for learning and training. KORE brings balance to the workplace and creates space division allowing work and gathering areas to easily be reconfigured. It provides mobile boundaries that are functional and flexible giving users a series of security and comfort.

Work|Able™

Now more than ever, we're being challenged to maximize every inch of space while providing separation to support a safe distance between individuals. Therefore, the walls and surfaces need respond accordingly to do more "to earn their place."

Due to increased hygiene requirements in today's environments, we don't want the pendulum to swing too far and cause the space to feel sterile.
